NORTH CAMP SURGERY
IPC ANNUAL INFECTION CONTROL STATEMENT

North Camp Surgery

18th May 2026

Purpose

This annual statement will be generated each year, in accordance with the requirements of the Health and Social Care Act 2008 Code of Practice on the prevention and control of infections and related guidance. The report will be published on the practice website and will include the following summary:

- Any infection transmission incidents and any action taken (these will have been reported in accordance with our significant event procedure)
- Details of any infection control audits carried out, and actions undertaken
- Details of any risk assessments undertaken for the prevention and control of infection
- Details of staff training
- Any review and update of policies, procedures, and guidelines

Infection Prevention and Control (IPC) lead

The lead for infection prevention and control at North Camp Surgery is Casie Thompson, Practice Nurse

The IPC lead is supported by Karen Lewis, Practice Manager

a. Infection transmission incidents (significant events)

Significant events involve examples of good practice as well as challenging events.

Positive events are discussed at meetings to allow all staff to be appraised in areas of best practice.

Negative events are managed by the staff member who either identified or was advised of any potential shortcoming. This person will complete a Significant Event Analysis (SEA) form which commences an investigation process to establish what can be learnt and to indicate changes that might lead to future improvements.

All significant events are reviewed and discussed at several meetings each month. Any learning points are cascaded to all relevant staff where an action plan, including audits or policy review, may follow.

In the past year, there have been no significant events raised which related to infection control. There have also been no complaints made regarding cleanliness or infection control.
